

Solar 2005 Conference

Otago University, Dunedin, New Zealand

## Index to Papers

ISBN: 0-473-10937-9

1. [A Mixed Mode Natural Convection Solar Dryer with Biomass Burner and Heat Storage Back up heater – E Tarigan etc](#)
2. [A roof integrated solar heating system without storage – W Saman etc](#)
3. [A theoretical model of a natural convection solar air heater – K S Ong etc](#)
4. [Ambient energy fraction of a heat pump – L Aye etc](#)
5. [Climate action partnership project – Monitoring of solar home systems in Sri Lanka – L N Tan](#)
6. [Commercialisation of a photovoltaic salt water swimming pool chlorination system – W Brazier etc](#)
7. [Design analysis and investigation of a low-head simple reaction water turbine – A Date etc](#)
8. [Design of an optimised PV system for a remote Himalayan village – A Zhand etc](#)
9. [Design of PV powered high efficiency pool pump systems – A B Sproul](#)
10. [Development of climate data for building related energy rating software – B Ridley etc](#)
11. [Developments in climate data for sustainable future – I Muirhead etc](#)
12. [Emperical validations etc – M Dewsbury](#)
13. [Energy efficiency in NSW schools – M Alfris etc](#)
14. [Energy evaluation of single and double-skin glazed facades in climatic conditions of central European region – D Plsek etc](#)
15. [Evacuated non-tubular solar thermal collectors – Y Yin etc](#)
16. [Evaluation of occupant perception and satisfaction in two new office buildings – L Aye etc](#)
17. [Experience of entry barriers for a new renewable energy business in Australia – W Brazier](#)
18. [How are solar water heaters used in New Zealand – A R Pollard etc](#)
19. [How expensive is solar photovoltaic electricity in Australia – A Zahedi](#)
20. [Improving Energy Supply Efficiency – A Case for Distributed Generation - A.I. Gardiner](#)
21. [Integrating wind generation into the Australian national electricity market – I MacGill](#)
22. [Low-cost hydrogen storage options for solar hydrogen systems for remote area power supply – S M Ali etc](#)
23. [Modelling and assessment of an experimental combined evacuated-tubes-direct-flat-place solar heater – F K Abdalla](#)
24. [Modelling solar-thermal desalination systems – J Leblanc etc](#)
25. [Modelling the convective flow in solar thermal receivers – K C Yeh etc](#)

26. [Monitoring of energy efficiency – C R Bob Lloyd](#)
27. [Off-grid photovoltaic application in Indonesia: an assessment of current experience – M Watt etc](#)
28. [Open cycle liquid desiccant air conditioning systems – theoretical and experimental investigation – M Krause etc](#)
29. [Peak oil: the role of local authorities in powering down to the solar age – L McBey](#)
30. [Performance analysis of a proton exchange membrane unitised regenerative fuel cell for solar hydrogen systems for remote area power supply – A Doddathimmaiah etc](#)
31. [Performance of a solar water heater with a vertical mantle heat exchanger – Y C Soo Too etc](#)
32. [Performance of Solar and water heat pumps in New Zealand – C R Bob Lloyd](#)
33. [Performance of Water-in-Glass evacuated tube solar water heaters – G L Morrison etc](#)
34. [Recirculation – a new low energy method of preserving cereal grains – G Thorpe](#)
35. [Renewable energy and sustainability – an evaluation – R J Fuller](#)
36. [Reslab – A status report includes capability statement – T L Pryor](#)
37. [Solar thermal powered desalination: membrane vs distillation technologies – K Lovegrove etc](#)
38. [Some options for state-based renewable obligations in Australia – R J Passey etc](#)
39. [Summer temperatures in New Zealand houses – L J French etc](#)
40. [Tariff implication for the value of PV to residential customers – M E Watt etc](#)
41. [Technical and financial evaluation of a solar dryer in Bhutan – L Aye etc](#)
42. [The Australian solar resource updated – T Lee etc](#)
43. [The outlook for solar photovoltaic technology over the next decade – D Singh](#)
44. [The potential economic impact of distributed energy resources on an under-utilised distribution network – I Sanders etc](#)
45. [The social benefits of solar as a form of risk mitigation – a case study of California's deregulation period – K J Hennigan](#)
46. [The Windflow 500 – a unique NZ wind turbine – G Henderson](#)
47. [Thermal performance of sustainable energy features – L Aye etc](#)
48. [Thin-film solar cells: review of technologies and commercial status – M Green](#)
49. [Third generation photovoltaics: routes to high efficiency that retain the advantages of thin film – M Green etc](#)
50. [Towards the development of a home rating scheme for free running buildings – M Kordjamshidi etc](#)
51. [Understanding maximum power point tracking: A practical approach for students – W Lawrance](#)
52. [User friendly software for calculation of limiting cell efficiencies for research on multijunction solar cells – J W Rudd etc](#)
53. [Victoria's solar water heater and housing energy efficiency regulations – K I Guthrie](#)
54. [Victorian solar hot water rebate program review of outcomes 2000 – 2004 – R Hines etc](#)
